

# Login Destination

[Configuration](#) > [Personnes](#) > [Login Destinations](#) > add...

## Redirect to page

Page interne ou URL externe

<front> ← Page de redirection

Specify page by using its path. Example path is *blog* for the blog page. *<front>* is the front page. *<current>* is the current page. Precede with *http://* for an external URL. Leave empty to redirect to a default page.

## Redirect upon triggers

Login, registration, one-time login link

Logout

← Choix du/des déclencheur(s)

Redirect only upon selected trigger(s). If you select no triggers, all of them will be used.

## Redirect from specific pages

Toutes les pages sauf celles listées

Seulement les pages listées

Specify pages by using their paths. Enter one path per line. The '\*' character is a wildcard. Example paths are *blog* for the blog page and *blog/\** for every personal blog. *<front>* is the front page. *user* is the login form. *user/register* is the registration form. *user/\*/edit* is the one-time login (e-mail validation).

## Redirect users with roles

administrateur

webmaster

partenaire

← Associer à un rôle si besoin

Redirect only the selected role(s). If you select no roles, all users will be redirected.
